

## Adjustable differential pressure switch

**P233**
*Sensitive differential*

This switch senses a change in the (differential) pressure as the airflow changes. The (differential) pressure is applied to the two sides of a diaphragm in the control.

The spring-loaded diaphragm moves and actuates the switch. The series P233A/F can also be used to detect small positive gauge pressure or to detect a vacuum.

### Features

- ▶ One switch to measure relative pressure, vacuum or differential pressure
- ▶ Various accessories available
- ▶ Compact and durable construction
- ▶ Easy mounting and wiring, various mounting possibilities
- ▶ Standard PG 11 nipple and optional DIN 43650 connector
- ▶ Accurate and stable switch point
- ▶ SPDT contact standard

### Application

- ▶ This (differential) pressure switch is used to sense flow of air, single or differential air pressure

Typical applications include:

- ▶ Detect clogged filter
- ▶ Detect frost or ice build-up on air conditioning coils
- ▶ Air proving in heating or ventilation ducts
- ▶ Maximum airflow controller for variable air volume system
- ▶ Detect blocked flue or vent
- ▶ Monitor fan operation

Dimensions in mm
